

Exhibitor Demonstrations

Thursday, November 20

11:30 a.m. – 12:00 p.m.

Booth 2947: How to Increase Parent Engagement in Speech, presented by At Home Articulation

Learn how to form partnerships with parents, establish clear roles/expectations, and send homework efficiently with At Home Articulation. Let's improve your speech outcomes and boost carryover!

Booth 3941: Hearing Healthcare Provider's Role Related to Genetic Testing and Counseling, presented by Eli Lilly and Company

This session will describe the evidence for how a genetic diagnosis in sensorineural hearing loss can inform care and how to remove some of the barriers to genetic testing through the use of a no-charge, sponsored genetic testing and counseling program.

12:15 p.m. – 12:45 p.m.

Booth 2947: Streamlining Clinical Workflow with Single-Use Endoscopes, presented by Ambu, Inc.

Ambu will host a special guest who will present on how single-use endoscopes can help streamline your workflow.

Booth 3941: Reimagine Speech Therapy with Fusion by Ensora Health, presented by Ensora Health

See how Fusion by Ensora Health streamlines the full speech therapy workflow in this interactive demo, covering intake, scheduling, documentation, billing, and reporting. Discover upcoming AI-powered tools that save time and reduce admin tasks, giving therapists more freedom to focus on delivering exceptional client care.

2:00 p.m. – 2:30 p.m.

Booth 2947: An Evidence-Based AI-Driven Platform for Speech and Cognitive Therapy, presented by Constant Therapy

Constant Therapy is a leader in evidence-based, AI-driven tools that can be used in conjunction with SLP-generated plans of care. Please join us to explore our newest offerings and experience the program in action!

Booth 3941: Rethinking Versatile Tools for Early Development: b is for ball®, presented by Biggest Little

b is for ball® transforms a simple ball into a tool for babies and kids to soothe, build emerging skills, and explore their environment. This Red Dot Award-winning design is safe, sensory-rich, and created for multi-stage use (0+) — one versatile tool for movement, discovery, and sensory engagement.

3:45 p.m. – 4:15 p.m.

Booth 2947: New Fifth Editions of Expressive One Word Picture Vocabulary Test and Receptive One Word Picture Vocabulary Test, presented by Academic Therapy Publications, Inc.

This session will display and review the new editions of the EOWPVT-5 and ROWPVT-5. The information will include a brief overview of using one-word vocabulary assessments, details of their development, differences between the latest versions, and a discussion of their psychometric properties, such as reliability and validity.

Booth 3941: Innovating Care for School-Based SLPs, presented by Thrive Therapies Group

Thrive Therapies provides direct services to historically under-resourced schools—and we built the AI-powered tool we wished we had. Our platform streamlines SOAP notes and report writing for school-based SLPs, saving time and improving the efficacy of treatment. Discover how Thrive blends clinical expertise with innovation to support providers and the communities they serve.

Friday, November 21

10:30 a.m. – 11:00 a.m.

Booth 2947: Introduction to Pharyngeal Electrical Stimulation (PES) for Post-Stroke Dysphagia, presented by Phagenesis

The Phagenyx® Neuromodulation System addresses the root cause of dysphagia, one of the most significant, early barriers to stroke recovery. Our clinical team of SLPs will demonstrate our system and share how teams are utilizing it at the bedside for early intervention with no disruption to workflow.

Booth 3941: Otoscan-Digital Ear Scanning, presented by Natus Sensory

Product overview and live demonstration-3D digital ear scanning solution for accurate impressions, reduced remake rates, and efficient workflows in custom hearing care.

12:00 p.m. – 12:30 p.m.

Booth 2947: Improving Dysphagia Therapy across the Lifespan, presented by The Side Biter (Gnosh, Inc.)

Meet the SLP inventor of The Side Biter & Mini Biter therapeutic chewing-swallowing exercise tools. Hear the product development story from sketch to reality. Learn about clinical rationales, professional trials, observational data & functional dysphagia treatment strategies for children & adults. Take advantage of free products, discounts & coupons.

Booth 3941: Enhancing Pedagogy and Clinical Preparation in Communication Sciences: A Look into Lippincott Connect, presented by Wolters Kluwer

This session offers an exploration of Lippincott Connect, a comprehensive digital learning platform designed to support academic instruction and clinical readiness in speech-language pathology and audiology programs. Attendees will examine how the platform integrates authoritative content, including interactive multimedia, formative assessments, and analytics that inform teaching and learning outcomes. Faculty, clinical educators, and program directors will gain insights into how Lippincott Connect can be leveraged to align with curriculum goals, support diverse learning styles, and foster evidence-based practice among students preparing for careers in communication sciences and disorders.

12:45 p.m. – 1:15 p.m.

Booth 2947: Streamlining Clinical Workflow with Single-Use Endoscopes, presented by Ambu, Inc.

Ambu will host a special guest who will present on how single-use endoscopes can help streamline your workflow.

2:30 p.m. – 3:00 p.m.

Booth 2947: TeachTown Language Accelerator: Providing Personalized Language Intervention at Scale, presented by TeachTown

TeachTown Language Accelerator is a technology-based, personalized language intervention program designed for PreK-Elementary students with deficits or delays in any area of language. Language Accelerator equips

Exhibitor Demonstrations are not eligible for continuing education credits.

classroom teachers and school-based SLPs to provide language intervention at scale to help address students' current language deficits and prevent later language and academic difficulties.

Booth 3941: Using Video to Elevate Learning, Caregiver Support, and Clinical Outcomes, presented by Intelligent Video Solutions

Discover VALT in action! This demo demonstrates how video recording, live observation, and review can enhance training, engage caregivers, and promote clinical excellence. See VALT's intuitive features for recording, reviewing, and analyzing sessions that make learning, collaboration, and evidence-based practice more effective.

4:15 p.m. – 4:45 p.m.

Booth 2947: Working at All in 1 SPOT, presented by All in 1 SPOT with Theratalk

In this session, I will introduce All in 1 SPOT with Theratalk, a leading speech-language pathology and therapy agency in New York City. I will share what it's like to work with our team, highlighting the supportive and collaborative culture that empowers providers to grow while making a real difference. I'll also walk through our mission—to deliver high-quality, compassionate, and compliant services to children and families—and explain the wide range of communities we serve, from NYC Public Schools and Early Intervention to private clients.
